FIRST CLASS LIGHTING

**360°**  
Light & Sound

# About us

We are a young, innovative enterprise in the lighting industry. Our products are based on a well thought out lighting concept with interchangeable color filters and a large selection of base types for all conditions.

Our company staff has grown from 3 to more than 30 qualified employees who contribute to our success and provide the precondition for our high-quality products.

# Special Features

In order to maintain the illusion of the moon, all bases are hidden from view.

The quality of high-grade materials backs up the tasteful appearance.

# Product overview

## Globes

Full Globes are available with four different base types in sizes from 250 mm to 750 mm.

## Half globes

Half globes can be used as floor, ceiling or wall lights outside and indoors.

## Ceiling lights

With the fully adjustable height of our ceiling lamp and the three available sizes, there are no limits to the possibilities.

## Pendant lights

Pendant lights open completely new possibilities for the lighting arrangement of indoor and outdoor facilities.

## Pendant lights with mirror

The pendant light with mirror is available in three standard sizes: 350 mm, 550 mm and 750 mm.

## Suspended light

The areas of application for suspended lights are virtually unlimited. They are ideally suited to modern architecture.

## Battery lights

Battery lights have already found the most varied applications. They are ideal for homes, gardens, events and catering.

## Floating lights

Floating lights let ponds, pools and lakes shine in captivating light.

## Floating battery lights

With an average operating time of 6 to 8 hours, the floating battery lights are the perfect decoration for any pool party.

## Battery lights with tray

The battery light with a tray is a real highlight for every occasion.

## Column lights

Moonlight column lights create completely new dimensions of lighting enchantment.

## Stone Look

Even when not illuminated, our new Stone Look series is an eye-catcher for homes, gardens and yards.

## Lights with acrylic table top

Lights with a robust acrylic top from Moonlight form the center of every living room.

## Filter system

Moonlights' globally patented filter system adds an attractive array of 24 colors; up to 250 colors are also available.

You may select a white (standard) or stained surface or differently structured Stone Look surfaces.

All lights from Moonlight are available in these different surfaces

## Standard white

These full and half moons which appear in classical white in the daytime reveal their true white or colored face at night. Our filter system patented worldwide allows the choice of 24 colors in many different shades.

### At night

### In the daytime

## NeverDark - Safety lighting

Safety entirely without power and without illuminants

Hardly distinguishable from the standard design, yet with a vital difference. And you do not notice the benefit of this difference until the emergency – without any electricity, our NEVERDARK safety lights shed a pleasant basic light which becomes an orientation guide in the dark in case of a power failure.

### With power

### Without power

## Stone Look

Nature served as a model. In the daylight, our Stone Look lights may hardly be distinguished from the original. At night, however, they shed a uniquely pleasant and soothing light.

Large selection of finishes available:

### Stone Look

## Daylight Color (DLC)

### At night

### In the daytime

# Extensions of the product range

### Sensor with remote control

Any Moonlight globe can be transformed to an automatic light quickly and simply by the installation of a radio receiver with integrated twilight sensor, resulting in full automatic control.

### Reflex hood

The reflex hood is offered of aluminium or stainless steel in all RAL colors. Globes with reflex lights may be installed underground or surface mounted. Column lights, pendant lights, DLC lights and the Stone Look series are also available with a reflex hood.

# Moonlight Sound lights – the optical sound experience

## Moonlight Sound lights

The combination of light and sound without any visible loudspeakers. The 360° radiation achieves an optimum light and sound dispersion.

These lights designed for outside areas are hardly distinguishable from the remainder of the wide Moonlight range. The wattage ratings for sound range from 120 and 150 to 200 Watt per Moonlight globe depending on its size.

The Sound lights may be used both in all areas either with cables or with a underground mounted base, or as pendant lights for indoor and outdoor application. They may be installed e.g. in trees or on building or house facades.

With this Moonlight Sound Lights satisfy many customers providing them with yet another innovative feature of interior or exterior design.

## Moonlight Sound lights in LED design:

An extraordinary optical sound experience.  
The color is determined by the music

## Light & Sound – Stylish lighting for luxury listening comfort.

### Technical data Moonlight Sound System

Size	MAX	RMS	Frequency range	Impedance
350 mm	120 W	60 W	60 – 20.000 Hz.	4 Ohms
550 mm	150 W	75 W	50 – 20.000 Hz.	4 Ohms
750 mm	200 W	100 W	40 – 20.000 Hz.	4 Ohms

# Base solutions for all applications

**MAG**

**Light and surface mounting base**

Floor or wall light to be screwed onto solid surfaces.

Item No.	Ømm	Designation
250.010	250	MAG
350.010	350	MAG
550.010	550	MAG
750.010	750	MAG

**MBG**

**Light and base for underground**

For underground installation.

Item No.	Ømm	Designation
250.020	250	MBG
350.020	350	MBG
550.020	550	MBG
750.020	750	MBG

Note: The tints cannot be rendered in true colors

Moonlight Filter system is unique with simple and quick installation

The adapter ring is fastened onto the socket.

The light bulb can now be installed.

Finally, the filter is placed on the adapter ring and turned clockwise until it is firmly in place.

## International design awards

We have received eight design awards of international importance for our lights within three years.
