FIRST CLASS LIGHTING

# MOONLIGHT® GLOBE LIGHTS

Moonlight® Globe Lights are dramatic, shatterproof spheres from 10 to 30" in diameter that create an elegant ambience for interiors and landscapes.

Engineered, developed and manufactured in Germany, Moonlight® has won numerous design awards and has received some of the lighting industry's highest ratings for resistance to damaging elements like moisture and dust intrusion.

Designed to stand up to commercial applications, Moonlight® Globe Lights are also perfectly suited for households using standard 120v power.

Moonlight® is ideal for both security and accent lighting providing a soft, glare-free glowing light that illuminates walkways, porches, decks, landscaping, entries, stairwells, pools, lakes and more.

Moonlight's versatile product line can accommodate every use you can think of:

- Secured to the ground for landscape lighting
- Speaker Globes for indoor/outdoor Light & Sound
- Floating for use in a lake, pool or fountain
- Pole mounted for street or driveway lighting
- Portable as an indoor/outdoor lamp
- Suspended from a ceiling, tree top or roof eaves as a pendant light with or without sound
- Cordless battery operated to take with you camping or to the beach

# Variety

Moonlight® Globe Lights are available in a great variety of sizes and options to suit every application.

There are literally 10,000 different combinations you can create with Moonlight®. A variety of power options, size, color and usage variations are available. In addition, Moonlight® Globe Lights use energy efficient compact fluorescent bulbs or new LED bulbs.

## Portable

Using an extra long cord, our portable version plugs into any standard household plug and can be used both inside and outside. *Available in white, daylight colors and stonelook colors with interchangeable color filters, full and half globe shapes and in sizes from 10" to 30" in diameter.*

## Hard Wired

Mounted directly to a surface as you would any fixed light, there are two options: Surface Mount and Subsurface Mount. Surface mount is for a wall, ceiling, exterior hard surface, pool deck, dock piling, etc. Subsurface Mount is for use in landscape applications. *Available in white, daylight colors and stonelook colors with interchangeable color filters, full globe, half globe (surface only) and in sizes from 10" to 30" in diameter.*

## Cordless

Using integrated rechargeable batteries, our cordless version lets you take Moonlight® anywhere. Great as a table centerpiece at a wedding or special event, fabulous grouped as an accent, on stairs or designating an entry, combine with optional tray for VIP cocktail service, an alternative to the campfire on the beach, a utility light when the power goes out, this versatile version has many uses. *Available in white, daylight colors and stonelook colors with interchangeable color filters in sizes from 10" to 30" in diameter.*

# Style Options

to suit any

# Application

## Full Globes

Our most popular style of globe is the full globe. Consisting of a sphere with a hidden flat bottom for stability, this globe appears like a full globe from above. The hidden base allows the globe to rest safely on any surface. Mounting bases for permanent indoor/outdoor installation are available.

## Half Hemisphere Globes

Our hemisphere globe is perfectly suited for a low profile application. Great as a landscape light, an entry light, as a security light for a stairwell or decoratively as a wall sconce. Mounting bases for permanent indoor/outdoor installation are available.

## Floating Spherical Globes

One of the most memorable products in our line is our floating globe. A completely spherical light that's weighted to remain upright and completely watertight. This globe will draw a crowd and create a sensation where ever it's used, whether pool, lake or large fountain.

## Moonlight® Sound

Never before has there been a fixture such as this, combining soft illumination with 360° professional audio speakers in one fixture. A perfect solution for theme parks, night clubs, lounges, events, rentals and home use. Moonlight® Sound is a revolutionary product whose time has come.

## Pendant Globe

Fantastic for both home and commercial use, the pendant globe fits any decor. Available with a full range of color variations plus an optional internal speaker, the light has the benefit of bringing both illumination and music to the table in one fixture.

# Color Options

A rainbow of color options to transform Moonlight® Globe Lights

## Color Filters

A wide assortment of interchangeable color filters act like sleeves over the compact fluorescent bulb. Filters turn your white Moonlight® into a colorful spectacular matching your event's color plans or simply setting the right mood. Choose from 24 different colors encompassing multiple shades of yellow, green, pink, violet, red, turquoise, blue and more.

## Daylight Colors

Fully integrated into the polyethylene material, Moonlight® Daylight Colors are a permanent option for both day and night visibility. Colors include red, green, blue and yellow as well as stone looking colors terra cotta, sandstone and granite. Custom matching to corporate colors is available.

## LED

The newest option offered by Moonlight® incorporates the latest LED technology in programmable LED lighting. Softly transitioning colors add drama and excitement to interior spaces, special events, landscape grounds and productions.

## NeverDark®

Available as an option on every Moonlight® product, NeverDark® is a mineral additive that allows the globe to glow when power has been disconnected. Illuminating for up to 90 minutes, NeverDark® adds a security option to the light allowing for safer emergency egress in emergencies.

Dark Blue	Dark Pink	

# 5 Options to Suit your needs

# Installation

## Plug-In

Flexible use is the key with our standard plug-in light. Use it as you would any lamp with the added benefit of water resistance so you can take it outside with you.

## Battery

Cordless for unlimited possibilities like camping, beach or anywhere you want to go. Charge the globe during the day for up to 8 hours of soft, glowing light in the evening.

## Surface Mount

A stable, flat bottomed mounting base for use on solid surfaces like sidewalks, pool decks, boat docks etc. complete with pilot holes for wiring and anchors.

## Sub-Surface Mount

Specially designed for landscape lighting with a deep well and extra-long anchors for stability. This mount also has pilot holes for wiring.

## Floating

Completely sealed and water tight, our floating globe can operate on a rechargeable battery or with a waterproof electrical cable which also serves as a tether to keep the globe in place in the water.
