

Moonlight[®] USA, Inc.

FIRST CLASS LIGHTING

Award Winning Moonlight® Globe Lights now available in the United States

Seen at the finest residences and resorts throughout Europe, Asia & Dubai

Moonlight® Globe Lights are dramatic, contemporary spheres from 13 to 30" in diameter that create a dramatic ambience for interiors and landscapes at luxury homes and resorts.

Energy Efficient

Moonlight® Globe Lights operate with compact fluorescent bulbs for minimal energy usage.

Set the mood any time you wish

Moonlight® Globe Lights come standard in white with a rainbow of interchangeable color filters to change the mood in minutes. In addition, assorted permanent colors for both daytime and nighttime enjoyment are available. The daytime colors have two lines. The natural shade line includes terra cotta, granite and sandstone. The bright line includes red, yellow, blue and green.

Corporate color matching for light filters and daylight colors is available.

Virtually Indestructible

Moonlight® Globe Lights are water and dust resistant and virtually indestructible. The lights have received some of the industry's highest standards for resistance to dust and moisture.

Moonlight® Globe Lights offer 3 different power options:

- rechargeable battery
- standard household wiring
- standard household plug with extra-long cord

All lights have a remote control option.

Moonlight® globes are strong, durable and suited for both commercial and household use. They're made from a virtually indestructible polyethylene plastic that's shatter proof and withstands temperature extremes from 40° below zero to 170° F. Moonlight's electrical components are safe from corrosive elements like salt water and minerals because they're sealed inside the base of the globe.

Moonlight® received some of the industry's highest ratings for resistance to dirt, dust and water. Moonlight® globes use a specially manufactured compact fluorescent bulb to assure a pleasingly soft light, accurate colors and thousands of hours of usage with minimal electrical consumption.

Add a little drama to the everyday

Moonlight globes are strong, durable and suited for both commercial and household use. They are engineered to be used in all of these locations:

- beach
- back yard
- patio & deck
- float in the pool
- landscaping
- accent and dramatic lighting
- security and safety lighting
- entry lighting
- mount them to your dock posts
- put them on your boat
- hang Moonlight® globes as pendant lights over your bar
- connect the new Moonlight Sound® globe speakers with LED lights to your audio system and watch the colors change with the rhythm of the music
- group assorted Moonlight® globes on your patio or lanai
- bring them inside for a dramatic entrance to your foyer or great room

Stone look in granite, (L) during daylight and (R) when lit at night.
